

MassDEP Water Management Program Permitting Schedule Summary* Post Adoption of the Revised Water Management Regulations at 310 CMR 36.00 in November 2014				
Watershed Name	# Public Water Supply (PWS)/# Total Permits to be Renewed	Orders to Complete (OTC) Issued and Consultation Sessions for Permit Renewals*	Permit Renewals Issued Through 1/2021	New and Amended Permits Issued Through 1/2021
		An OTC requires submission of information needed to complete permitting. An OTC is part of the permitting process for all new permits, permit renewals, and amendments. Consultation Sessions to develop mitigation, minimization and fishery protection plans can be requested by the permittee at any time during the application review/ permit development process.	All permits are released as draft for 30-day comment period prior to final issuance. New permits are issued for new withdrawals or increased withdrawals by existing permittees. Amended permits are issued to add a new point source or amend other permit conditions.

Hudson	3 PWS / 6 Total	Permits renewed in 2008 prior to PEA*	Review/amend per new regulations: 2024	
<p>*NOTES on Water Management Permit Implementation</p> <p>Water Management permits are issued on a 20-year cycle and must be renewed by the permittee. Pursuant to M.G.L. c. 30A, section 13, and 310 CMR 36.18(7), if a permit renewal application is filed by the filing deadline, the existing permit will be administratively continued in force and effect until MassDEP issues a final decision on the renewal application. Permit renewal issuance dates listed above are tentative and will depend on the consultation process and time needed to develop permits that incorporate all regulatory requirements.</p> <p>After the economic downturn of 2008, Water Management Permit renewals were postponed by the Permit Extension Act (PEA), Section 173 of the Chapter 240 of the Acts of 2010, as amended by Chapter 238 of the Acts of 2012, which extended all existing permits by 4 years beyond their original expiration date.</p> <p>Since adopting revised Water Management Regulations at 310 CMR 36.00 on November 7, 2014, MassDEP has taken time to incorporate new requirements into permitting and to work closely with each Water Management Act (WMA) permittee to fully consider all aspects of their individual situations and ensure thoughtful and implementable permits.</p>
